

## Description

### General

The SC1512-40ATO transceiver from SANOC is the industry standard 1×9 package with SC duplex fiber optical connector for serial optical data Communications applications specify of Gigabit Ethernet IEEE802.3z/D5 and Fiber Channel. This modules is designed for multi mode fiber and operates at a nominal wavelength of 1550nm with cost effective and high performance

### Transmitter Section

The transmitter consists of a high-performance 1550 nm MQW DFB structure laser in the optical subassembly (OSA), which is housed within a metal package. In addition, this component is also class 1 laser compliant with according to International Safety Standard IEC-825

### Receiver Section

The receiver contain of an integrated planar InGaAs PIN photodiode coupled to a high sensitivity transimpedance amplifier (TIA) in an OSA. This OSA combination is mated to a post amplifier IC that provides the post amplification and SD (Signal Detect) indication circuit, which provides LVTTTL logic low state output when an unusable input optical signal level is detected.
